Payment Options

IQ Dental and Implant Centre offers a variety of flexible payment and dental finance options for all your dental needs. We have helped many people get their dental treatment started immediately by providing convenient ways to pay. Please ask one of the team for further information and they will help you with all the information you need.

1. Payment for treatment (excluding orthodontics)

Option 1: Full payment in advance of specialised dental treatment.

We offer a 5% discount for all specialised dental treatment paid in full in advance. This treatment includes all crown and bridge work, root canal therapy, cosmetic dental procedures and implant treatment. This offer is not available to plan patients who already enjoy a fixed 10% discount.

Option 2: Pay as you go.

Treatment is paid for when completed as per the treatment schedule. This can be done either by cash, card or bank transfer (see bank details below).

Option 3: Flexible Payment Plan (FPP)

An interest free Flexible Payment Plan (FPP) is available either as ongoing payments for ongoing treatment (such as anti-wrinkle treatment) OR a fixed number of payments (up to ten) to repay a one-off treatment (such as implants). This requires setting up a Direct Debit Instruction but is not a credit agreement and not subject to credit checks or approval.

Option 4: Finance payment (treatment value over £2,000).

This requires the setting up and approval of dental treatment finance through Chrysalis Finance. This requires an agreement by yourself and the finance company, who will pay us directly for the treatment. Repayments are subject to interest with various repayment terms available.

2. Payment for treatment (orthodontics only)

Option 1: Full payment in advance of orthodontic dental treatment.

We offer a 5% discount for orthodontic treatment paid in full in advance. This offer is not available to plan patients who already enjoy a fixed 10% discount.

Option 2: Flexible Payment Plan (FPP)

An interest free Flexible Payment Plan (FPP) involves an initial payment and a fixed number of ongoing payments (up to ten) to repay the remaining amount. This requires setting up a Direct Debit Instruction but is not a credit agreement and not subject to credit checks or approval.

Option 3: Finance payment (treatment value over £2,000).

This requires the setting up and approval of dental treatment finance through Chrysalis Finance. This requires an agreement by yourself and the finance company, who will pay us directly for the treatment. Repayments are subject to interest with various repayment terms available.
